– secretory epithelia S107
Papaine 348
Paradoxical vasoconstriction 71
Parathyroid hormone (PTH) 451

Pargyline 575
Patch clamp 279, 493, 577, 691, 694, S116, S142
– – analysis 589
– – studies 341
PCO_2 388
Perfused rabbit proximal tubule 643
Perfusion cuvette 552
Peripheral chemoreceptors 504
– resistance 432
Peritoneal dialysis 382
Peritubular cell membrane 607
Permeability 320
Peroxisome proliferator 377
Pertussis toxin 182, 264
pH, 59
pH-Microclimate 33
pH-Microelectrodes 33
Phenothiazines 327
Phloridzin 100
Phloridzin-sensitive transport 216
Phlorizin 252, S149
Phorbol ester TPA 409
Phosphate transport S149
Phosphatidylcholine 409
Phospholipid bilayers 341
Phosphorylation 123, 670
Physical exercise 500
Physostigmine 482
Pituitary cells 279
Plasma membranes S168
Plateau potentials 482
PO_2 388
Poikilothermia-inducing peptides 558
Postinspiratory phase 190
Postsynaptic effects 409
Potassium S90
– channel(s) 279, 365
– clearance 348
– conductance 153, 258, 292, 607
– current(s) 365, 526
– depletion 1, 153, 245
– excretion 76
– microclimate 625
Preepithelial barrier 625
Preoptic thermosensitive neurons 8, 558
Pressure oscillations 285
Primary culture(s) 566, S116
Prolyl 4-hydroxylase 64
Protein degradation 333
– kinase(s) 87, 670
– – C 409
– sparing 119
Protein-specific phosphatase 1 461
Protein turnover 333
Proton ATPase inhibitors S180
– pump activity S180
Proximal colon S85
– tubule 221, 488, S72, S156
– – pH S156
– tubules 252, 451, 607
Pulmonary afferents 190
– gas exchange 211
Pyrazinoate transport 643
Pyruvate 488

Q

Quantitative microscopy S90

R

Radom telegraph signal 355
^{86}Rb influx 440
Reactive hyperemia 388
Receptive fields 510
Receptors, muscarinic adenosine 264
Rectum 632
Regeneration 64
Renal acidification S180
– ammoniagenesis 245
– brush border membrane vesicles S174
– Cl transport S128
– cortex S160
– denervated dogs 382
– gluconeogenesis 1
– handling of lithium 55
– hemodynamics 638
– Mg reabsorption S66
– medulla 228
– potassium adaptation 76
– reabsorption 611
– shunt fraction 211
– sodium handling 382
– transport 541
Renin 41
Respiration 312, 664
Respiratory rhythm 190
Resting potential 163, 534
Reticulin 64
Retinal Müller (glial) cells 348
Retropertioneal space 519
Right atrial distension 170
RNA 333
Rubidium S168
– transport 440

S

Salamander olfactory receptor cells 589
Saline infusion 299
Salivary glands 649
Salt and gland secretion 414
– loading 547
(Sar^1, Ala^8) angiotensin II 221
Sarcomere length-force relation 456
Sarcoplasmic reticulum 341
Schwann M.e.p.p.s 476
Scorpion toxin 92
Secretagogues S85
Secretion 643
Shark S112
Shivering 312, 664
Short-chain fatty acids 33
Short-circuit current 327, S85
Shortening velocity 396
Silastic Teflon Millipore 320
Single atrial cell 264, 572
– channel recordings 589
– channels 355
– granule release 41
– heart cells 109
– nephron segment 27, 428
– – segments 421
Sinus venosus 684
SITS 33, 649, S142
Skeletal muscle 64, 199, 235, 275, 341, 440, 445, 500, 677
– – sodium channels 241
Skin blood flow 71
– temperature 175
Skinned chicken gizzard 87
– muscle fibers 456
– – fibres 87, 552
– smooth muscle 569
Slow currents 691
– M.e.p.p.s 476
Smooth muscle cells 566
Sodium 258
– balance 382
– channels 241, 577, 691
– clearance 55
– conductance 465
– coupled transport 607
– current 18
– deoxycholate 33
Sodium-dependent phosphate transport S149
Sodium excretion 547
– glucose cotransporter 252
– permeability 92
Sodium-potassium-chloride cotransporter S168
Sodium pump 299
– transport 327
– uptake S168
Sodiumnitroprusside 432
Soleus muscle 166
Somatosensory cortex 129
Spinal cord 312
– – cooling 312
Splanchnic nerves 519
Squid 105
Steady state gas exchange 211
Steroid hormones 670
Stimulus-secretion coupling S85
Stripping 632
Strontium 526
Subendocardium 388
Subepicardium 388
Subepithelial resistance 632
Submandibular acini 615
– gland 649, S107
Submucosal space 292
Substrate specificity 1
Sugar accumulation 216
– efflux 100
Sulfate distribution 235
– space 235
– transport S160
Superficial nephron 1, 245
Sweat duct S123
– glands S100
Synaptic delay 134
– transmitter release 134

T

Tachypneic states 190
Tactile stimulation 129
Taenia coli 87
TEA S107
Temperature 252
– Q_{10} values 476
– regulation 414
Tenotomized rat soleus 178
Tenotomy 178
Tension transducer 109
Tetraethylammonium 365, 404
Tetraethylammonium blockade 279
– (TEA) 526

Tetrodotoxin (TTX) 482
Thallium 145
Thermoreceptors 175
Thermoregulation 8, 312, 664
Thermosensitive neurons 8
Thermosensitivity 414
Thick ascending limb 611, S128
– – limbs 421
Thiocyanate S168
Thyroid hormones 428
– state 142
Thyroidectomized rabbits 428
Thyroidectomy 27
Thyroparathyroidectomy 541
Thyroxine 440
Tidal breathing 204, 211
Tissue slices 216
Tissues P_{O_2} distribution 305
Toad skin 327
Tolbutamide 493
Torasemide 611
Total peripheral resistance 432
Toxin from Conus geographus 241
– γ of the scorpion Tityus serrulatus 92
Tracheal epithelium S116
Transducer 109
Transepithelial Cl-conductance S123
– resistance 252
Transmitter release 134, 476
Transport inhibitors 285
– of Cl^-, HCO^-_3, Na^+ und K^+ S85
– – inorganic phosphate 541
– – – sulfate 541
– – organic cations 404
Trifluoperazine 327
Triiodothyronine 27, 428
– action 27
$Tris^+$ 465
TTX 18, 163, 465, 689
Tubules of frog kidney 153
Tubulo-glomerular feedback 221, 285
Turtle bladder S80
Type III procollagen aminopropeptide 500

U

Urethra 510
Urinary bladder 510
Urine concentrating ability S66
Uterine contracitility 670

V

Vagal section 664
Vagotomized pigeons 664
Vascular relaxation 170
Vasoconstriction in fingers 71
Vasodilator 432
Vasopressin S66
Venous pressure 432, 638
Ventilatory drive 504
– response 504
Ventral medulla 46
Ventricular cells 465
– muscle 142
– myocardium 388
Veratrine 299
Visceral afferent fibres 510
– nociception 510
Vitamin D metabolism 451
Voltage clamp 18, 677, 684
Voltage-clamp 199
Voltage-clamped frog skeletal muscle 677

W

Water immersion 638
Weak acid and base 59
– bases 370
Weightlessness 333
White rami 519
Whole cell recordings 589
Whole-cell patch-clamp 566

X

Xenopus laevis oocytes 577
Xenopus leavis eggs 370
X-ray diffraction 456
